

Bikash Joshi

Software Engineer · Desktop apps · Web · AI agent systems

bakashjee@gmail.com
github.com/BkashJEE · x.com/BkashJosi
bkashjee.github.io

Independent software engineer building desktop apps, AI agent plugins, and full-stack TypeScript tools. Use my own screen recorder for demos and my content planner for X; publish open-source tools and contribute upstream pull requests in the Hermes Agent ecosystem.

SELECTED PROJECTS

ScreenPolish Creator · desktop app source private

Sep 2026 - present

- Use this local screen recorder for my own demos and videos; my library holds 41 recordings. Built auto-zoom, cursor effects, webcam overlay, and MP4/GIF export with recordings kept on-device.
- Shipped 3 build formats: Windows installer, AppImage, and pacman. Enabled Wayland recording through PipeWire and portal capture, with Hyprland pointer tracking and evdev clicks that never read keyboard input.
- Share a pure-function renderer between preview and export so both use the same effects; the project has 575 tests passing. Added a JSON-output CLI for agent-driven workflows.

Electron · React 19 · TypeScript · WebCodecs · FFmpeg · Vitest

Hermes Bot Forge Creator · open source (MIT) github.com/BkashJEE/hermes-bot-forge

Sep 2026 - present

- Published a Hermes Agent plugin with 24 GitHub stars that turns one sentence into a configured bot: identity, memory, tools, scheduled routines, and a gateway service.
- Verify every provisioning step and roll back the bot if a step fails; install directly from GitHub with 1 command.

Python · pytest · systemd

Hermes X Mission Control Creator · full-stack web app source private

Sep 2026 - present

- Run content planning and review for 1 X account, my own @BkashJosi, including a daily 8am audit. Agent profiles move research through drafting and verification with owner review; I am the sole user.
- Built a backend with Supabase row-level security, SQLite fallback, and video-host allowlists; the project has 581 automated tests passing.

Next.js · TypeScript · Supabase · SQLite · zod · Vitest

PUBLISHED TOOLS

Hermes Agent Dock · Aug 2026 - present (42★ on GitHub) — native Hermes Desktop dock: profile chat, concurrent jobs, Kanban assignment (Python)

Repo Shelf (17★ on GitHub) — git repositories as books on a 3D bookshelf (TypeScript)

Codex Usage Meter (4★ on GitHub) — privacy-first usage meter with verified updates (Python)

OPEN SOURCE & EXPERIMENTS

14 open pull requests to NousResearch/hermes-agent; none merged yet. Proposed performance and reliability fixes for idle decode looping (#113268) and peer-less broadcasts to stdout (#113249), plus a global desktop HUD (#101951).

WRITING

Post about building with AI agents on X as @BkashJosi (x.com/BkashJosi).

SKILLS

Languages	TypeScript, JavaScript, Python, Swift, SQL, QML/Qt, Bash
Web	React 19, Next.js, Tailwind CSS, Vite, Supabase
Desktop & systems	Electron, WebCodecs, FFmpeg, Wayland/Hyprland, PipeWire, evdev, systemd, Arch Linux
AI & agents	Hermes Agent plugins, multi-agent orchestration, Claude Code, agent-friendly CLI design
Practice	Vitest, pytest, Playwright, GitHub Actions, PR-based workflow
